## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, drawn to methods for the detection of glutamate by combining an experimental sample with certain agents to yield a chromogenic product (steps a-b), classified in class 435, subclass 26.
- II. Claims 3-11, drawn to methods for the detection of ketol-isomerase activity by combining a sample in which the ketol-isomerase activity has been inactivated with certain agents to yield a chromogenic product (steps a-d), classified in class 435, subclass 26.
- III. Claims 12-29, drawn to methods for the identification of a compound that can inhibit microbial ketol-isomerase activity by comparing the ketol-isomerase activity in a solution that comprises a candidate compound to one that does not (steps a-g), classified in class 435, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Groups I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different effects. Group I is directed to the detection of glutamate.

Art Unit: 1623

Group II is directed to the detection of ketol-isomerase activity. Group III is directed to the identification of a compound.

In addition, the different inventions are directed to different modes of operation. The method of Group I involves combining an experimental sample with certain agents to yield a chromogenic product. The method of Group II is directed to the detection of ketol-isomerase activity involving the inactivation of the ketol-isomerase. The method of Group III is directed to the identification of a compound that can inhibit microbial ketol-isomerase activity by comparing the ketol-isomerase activity in a solution that comprises a candidate compound to one that does not.

---

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. To search the three independent and distinct inventions, set forth supra, would indeed impose an undue burden upon the examiner in charge of this application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1623

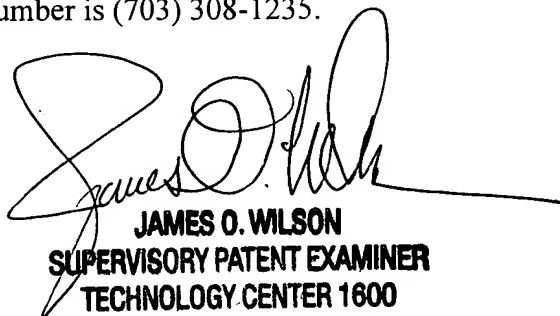

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Josephine Young whose telephone number is (703) 605-1201. The examiner can normally be reached on Monday through Friday, 8:30 a.m. to 5:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached at (703) 308-4624. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3014 for regular communications and (703) 872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
